### **DETAILED ACTION**

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 14, 2006 has been entered.

#### ***Amendment Entry***

2. The amendment filed February 23, 2006 has been entered. Claims 1, 26, 33 and 34 have been amended. Claims 1-42 are under consideration in the office action.

#### ***Withdrawal of Rejections***

3. The enablement rejection of claims 1-22, 26-30, 32-34, 37-38 and 41-42 under 35 U.S.C. 112, first paragraph, has been withdrawn in view of applicants' amendments and arguments.

### **EXAMINER'S AMENDMENT**

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Barry Shuman on May 25, 2006.

5. The application has been amended as follows:

Claim 21. (Currently Amended) An assay according to claim 20 + wherein the volume of the droplets is about 80 pl to about 1 nl.

***Allowable Subject Matter***

6. The following is an examiner's statement of reasons for allowance: The prior art does not fairly teach or suggest a binding assay, an analyte binding array or kit for sensing analyte mass comprising a multi-layer matrix of an analyte wherein the matrix extends up to 200 nm vertically from the surface of the substrate thereby allowing for a more concentrated binding area using the multi-layer to create the substantial depletion of an analyte present. Furthermore the prior art does not fairly suggest or teach detecting fluorescence and thereby determining the analyte mass looking at the amount of fluorescence detected by the analyte depleting multi-layer matrix plotted against protein concentration in a dose response curve.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Conclusion**

7. Claims 1-42 are allowed.
